

POS Software For the Restaurant Industry
Bringing More to the Table

► **Simply Better**

Whether you're operating a fine dining, quick service or even delivery restaurant, there is only one POS software solution that brings more to the table: PAR® PixelPoint POS for all Windows Platforms.

Our fully integrated, 32-bit Point of Sale and BackOffice software suite ensures that all our applications work together seamlessly, eliminating costly product support. Manage many restaurants as easily as you would manage one, with PixelPoint's Enterprise versions. Best of all PixelPoint POS empowers your people to be simply better thanks to its unmatched reliability, remarkable flexibility and ease of use!

“PixelPoint offers an excellent product designed for the hospitality industry. It is tailored to our environment, is super easy to use and train staff on. It provides us with excellent Back-of-House information and reports that help to change/shape the business both today and for the future”.

Tammy Grisdale, Director, The Docks Entertainment Complex.

“We were looking for a POS system that was easy to use, explain and train our staff on. The graphic interface is conducive to this and the system makes it easy to quickly enter orders efficiently.”

Bill Grant, Serious Coffee®.

Flexible. Thousands of POS features tailor the software to your needs, giving you the solution that's right for you.

Actionable. Make strong business decisions when you need to, by accessing hundreds of easy to use reports through Crystal Reports or DataMiner™.

► **Simply Helps You Outperform**

The bottom line in your operation is to provide a rewarding experience for your patrons. PixelPoint POS helps you achieve that goal, as it is simply easier to train your staff on, easier for your staff to quickly and accurately place orders, and easier for your managers to accurately track & compile sales and inventory information. Our solution allows everyone in your operation to make the best use of your investment.

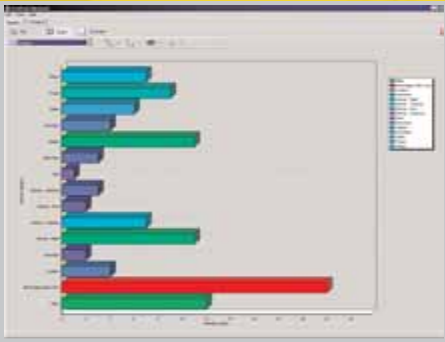

Intuitive. User friendly, intuitive screen layouts and commands greatly simplify and streamline the use of the software, so the next step is always obvious to even newly trained employees.

Simpler. You can toggle paid features on and off in the back office, so you see only what you need when you need it. Day to day configuration screens are simplified and easier to use.

Smarter. You can run any PixelPoint component from any terminal such as reporting, menu management or scheduling, allowing your staff to work smarter and faster, wherever they are.

► Product Offerings

PixelPoint provides you with scaled versions of our POS software to make your choice easier.

Standard POS Version – This POS package will provide you with great features like Membership & Loyalty, Menu Management, Time and Attendance, Inventory, and Reporting.

Professional POS Version – Includes all of the features in the standard package plus additional ones like Credit Card Management, Labour Scheduling, Reservations, Perpetual Inventory with Purchase Orders and more.

► Features That Simply Improve Your Bottom Line

Inventory

Manage your food costs and inventory with standard and perpetual features. Accomplish everything from tracking product sales to product usage and inventory usage by allowing the operator to build recipes for any product.

Menu Management

Built to accommodate the most demanding of menu layouts, PixelPoint's simplified menu designs make it easy to design unlimited menus for any restaurant environment, or just simply to add items on the fly.

Labour Management

Increase efficiency and dramatically reduce overall labour costs by controlling clock-ins and clock-outs, utilizing forecasting tools and control staffing levels at time of scheduled entry.

Credit Card Management

This credit information processor feature allows you to serve all transaction types, including Cash, Credit Card, Cheque, Gift Card Redemption and On Account for suppliers.

Reporting

With PixelPoint's powerful Reporting tools DataMiner™ and Crystal Reports, you can generate a wealth of meaningful, easy to read, real time information that can help you make smarter management decisions based on actionable information.

Time and Attendance

Keep your labour costs in check and increase employee performance by efficiently and effectively managing your time & attendance information. Our integrated features allow for unlimited shifts and multiple job positions for each employee.

Reservations

No matter how demanding your environment is, our waiting list and reservations feature interacts with our table management features to deliver a simply better way to manage your reservations.

Table Management

The intuitive graphical layout helps keep your table turnover high and your customers happy with features like Customer paging, Seat Warning & Table status indicators.

Gift Card, Loyalty & Membership

This strong fully integrated customer loyalty tool gives you the ability to offer gift card programs at one or multiple locations, track your customers' usage, create marketing promotional programs, reward loyal customers & manage coupons based on the products they purchase.

DataMiner™

This 3-dimensional in-depth analysis tool was designed by PixelPoint not only to give you insight into your data, trends and patterns but to deliver this large amount of data to your desktop.

3rd Party Interfaces

This robust feature expands the functionality of your POS by acting as a bridge, transferring information easily from your POS to leading 3rd party solutions, including those for payroll, accounting, inventory, and liquor control, eliminating repetitive data entry.
